

Maxiloda Case Study

“Innovative Transportation Products”

Substrate:
Aluminum to Composite

Problem: Need distribute 30 tons of stress over lifetime of the trailer. [Rivets](#) did not distribute the load efficiently.

Solution: PLEXUS® [MA560](#) provides long open time, high strength and [high elongation](#).

Results: 12 years without a single field failure. This equates to 100 million kilometers.

Maxiloda now guarantees their product for the lifetime of the trailer when assembled with **Plexus®**
