Exposure guidelines
Occupational Exposure Limits are not relevant to the current physical form of the product.

US WEEL Guides: Skin designation
TRIETHYLENETETRAMINE (CAS 112-24-3) Can be absorbed through the skin.

Appropriate engineering controls
Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station and safety shower.

Individual protection measures, such as personal protective equipment
Eye/face protection
Wear safety glasses with side shields (or goggles) and a face shield. Face shield is recommended.
Skin protection
  Hand protection
    Wear appropriate chemical resistant gloves.
  Other
    Wear appropriate chemical resistant clothing. Use of an impervious apron is recommended.
Respiratory protection
  In case of insufficient ventilation, wear suitable respiratory equipment.
Thermal hazards
  Wear appropriate thermal protective clothing, when necessary.

General hygiene considerations
  Keep away from food and drink. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Contaminated work clothing should not be allowed out of the workplace.
