# 3. Composition/information on ingredients

Mixtures				
Chemical name	Common name and synonyms	CAS number	%	
Benzyl 3-isobutyryloxy-1-isopropyl-2,2- ethylpropyl Phthalate	dim	16883-83-3	20 - 40	
DIBUTYL MALEATE		105-76-0	20 - 40	
Dibenzoyl Peroxide		94-36-0	10 - 20	
ISODECYL BENZOATE		131298-44-7	1 - 10	
Magnesium Sulphate		7487-88-9	1 - 10	
Oxirane, Methyl-, Polymer With Oxirane, Monobutyl Ether		9038-95-3	1 - 10	
Other components below report	able levels		20 - 40	
4. First-aid measures				
Inhalation	Remove victim to fresh air and keep at rest in center or doctor/physician if you feel unwell.	n a position comfortable for bro	eathing. Call a poison	
Skin contact	Remove contaminated clothing immediately a eczema or other skin disorders: Seek medica contaminated clothing before reuse.			
Eye contact		Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention if irritation develops and persists		
Ingestion	Rinse mouth. Get medical attention if sympto	oms occur.		
Most important symptoms/effects, acute and delayed	Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. May cause respiratory irritation. Skin irritation. May cause redness and pain. May cause ar allergic skin reaction. Dermatitis. Rash.			
Indication of immediate medical attention and special treatment needed	Provide general supportive measures and treat symptomatically. Keep victim under observation Symptoms may be delayed.			
General information	If you feel unwell, seek medical advice (show the label where possible). Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves. Wa contaminated clothing before reuse.			
5. Fire-fighting measures				
Suitable extinguishing media	Water fog. Foam. Dry chemical powder. Carl	oon dioxide (CO2).		
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as the	nis will spread the fire.		
Specific hazards arising from the chemical	During fire, gases hazardous to health may b	be formed.		
Special protective equipment and precautions for firefighters	Self-contained breathing apparatus and full p	protective clothing must be wo	rn in case of fire.	
Fire fighting equipment/instructions	Move containers from fire area if you can do	so without risk.		
Specific methods	Use standard firefighting procedures and cor	nsider the hazards of other inv	olved materials.	
General fire hazards	No unusual fire or explosion hazards noted.			
6. Accidental release mea	sures			
Personal precautions	Keen unnecessary personnel away. Keen pe	and a super frame and unuited at		

Personal precautions, protective equipment and emergency procedures Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Avoid breathing mist/vapors. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.

Methods and materials for containment and cleaning up	This product is miscible in water.			
containing up		, if this is without risk. Dike the spilled material, where this is and or earth and place into containers. Following product		
	Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.			
	Never return spills to original contained	ers for re-use. For waste disposal, see section 13 of the SDS.		
Environmental precautions	Avoid discharge into drains, water co	urses or onto the ground.		
7. Handling and storage				
Precautions for safe handling		ontact with eyes, skin, and clothing. Provide adequate al protective equipment. Observe good industrial hygiene		
Conditions for safe storage, including any incompatibilities	Store locked up. Store in tightly close Section 10 of the SDS).	d container. Store away from incompatible materials (see		
8. Exposure controls/pers	sonal protection			
At this time, the other constitu	e the only constituents of the product wh uents have no known exposure limits. for Air Contaminants (29 CFR 1910.1 Type	nich have a PEL, TLV or other recommended exposure limit. 000) Value		
Dibenzoyl Peroxide (CAS 94-36-0)	PEL	5 mg/m3		
US. ACGIH Threshold Limit Components	Values Type	Value		
Dibenzoyl Peroxide (CAS 94-36-0)	TWA	5 mg/m3		
US. NIOSH: Pocket Guide to Components	o Chemical Hazards Type	Value		
Dibenzoyl Peroxide (CAS 94-36-0)	TWA	5 mg/m3		
Biological limit values	No biological exposure limits noted for	or the ingredient(s).		
Exposure guidelines	Occupational Exposure Limits are no	t relevant to the current physical form of the product.		
Appropriate engineering controls	Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station and safety shower.			
Individual protection measures, Eye/face protection	such as personal protective equipm Chemical respirator with organic vapo			
Skin protection Hand protection	Wear appropriate chemical resistant	gloves.		
Other	Wear appropriate chemical resistant clothing.			
Respiratory protection	Chemical respirator with organic vapo	or cartridge and full facepiece.		
Thermal hazards	Wear appropriate thermal protective	clothing, when necessary.		
General hygiene considerations	Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Contaminated work clothing should not be allowed out of the workplace.			
9. Physical and chemical	properties			

Appearance	Paste.	
Physical state	Liquid.	
Form	Paste.	

Color	Blue
Odor	Slight.
Odor threshold	Not available.
	Neutral
pH Molting point/freezing point	
Melting point/freezing point	217.4 °F (103 °C) estimated
Initial boiling point and boiling range	Not available.
Flash point	285.8 °F (141.0 °C) estimated
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or exp	losive limits
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Explosive limit - lower (%)	Not available.
Explosive limit - upper (%)	Not available.
Vapor pressure	0.0004 hPa estimated
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Slightly soluble
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	176 °F (80 °C) estimated
Decomposition temperature	Not available.
Viscosity	Not available.
Other information	
Density	1.08 g/cm3
Explosive properties	Not explosive.
Flammability class	Combustible IIIB estimated
Oxidizing properties	Not oxidizing.
Specific gravity	1.08
10 Otability and reactivity	

# 10. Stability and reactivity

Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
Chemical stability	Material is stable under normal conditions.
Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
Conditions to avoid	Avoid temperatures exceeding the decomposition temperature. Contact with incompatible materials.
Incompatible materials	Alcohols. Amines.
Hazardous decomposition products	No hazardous decomposition products are known.

# 11. Toxicological information

# Information on likely routes of exposureInhalationMay cause irritation to the respiratory system.Skin contactCauses skin irritation. May cause an allergic skin reaction.Eye contactCauses serious eye irritation.IngestionExpected to be a low ingestion hazard.

Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. May cause respiratory irritation. Skin irritation. May cause redness and pain. May cause an allergic skin reaction. Dermatitis. Rash.

# Information on toxicological effects

A sute texisity		
Acute toxicity	Not known.	Tool Describe
Components	Species	Test Results
Dibenzoyl Peroxide (CAS 94-36-0	)	
<u>Acute</u> Oral		
LD50	Rat	7710 mg/kg
		/ / To hig/kg
Skin corrosion/irritation	Causes skin irritation.	
Serious eye damage/eye rritation	Causes serious eye irritati	on.
Respiratory or skin sensitization		
Respiratory sensitization	Not a respiratory sensitize	
Skin sensitization	May cause an allergic skir	
Germ cell mutagenicity	No data available to indica mutagenic or genotoxic.	ate product or any components present at greater than 0.1% are
Carcinogenicity	Not classifiable as to carc	inogenicity to humans.
IARC Monographs. Overall	Evaluation of Carcinogenie	city
Dibenzoyl Peroxide (CAS OSHA Specifically Regulate		3 Not classifiable as to carcinogenicity to humans. (0.1001-1053)
Not listed. <b>US. National Toxicology Pro</b> Not listed.	ogram (NTP) Report on Ca	rcinogens
Reproductive toxicity	This product is not expect	ed to cause reproductive or developmental effects.
Specific target organ toxicity - single exposure	May cause respiratory irrit	
Single exposure Specific target organ toxicity - repeated exposure	Not classified.	
Aspiration hazard	Not an aspiration hazard.	
12. Ecological informatio	n	
Ecotoxicity		ed as environmentally hazardous. However, this does not exclude the quent spills can have a harmful or damaging effect on the environment.
Persistence and degradability	No data is available on the	e degradability of any ingredients in the mixture.
Bioaccumulative potential		
Partition coefficient n-octar Dibenzoyl Peroxide	nol / water (log Kow)	3.46
Mobility in soil	No data available.	
Other adverse effects		nental effects (e.g. ozone depletion, photochemical ozone creation otion, global warming potential) are expected from this component.
13. Disposal consideration	ons	
Disposal instructions	Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Dispose of contents/container in accordance with local/regional/national/international regulations.	
Local disposal regulations	Dispose in accordance wit	th all applicable regulations.
Hazardous waste code	The waste code should be disposal company.	e assigned in discussion between the user, the producer and the waste
Waste from residues / unused products	Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).	
Contaminated packaging		may retain product residue, follow label warnings even after container s should be taken to an approved waste handling site for recycling or

disposal.

# 14. Transport information

#### DOT

Not regulated as dangerous goods.

# ΙΑΤΑ

Not regulated as dangerous goods.

#### IMDG

Not regulated as dangerous goods.

# Transport in bulk according to Not established.

Disclaimer	ITW Performance Polymers cannot anticipate all conditions under which this information and its product, or the products of other manufacturers in combination with its product, may be used. It is the user's responsibility to ensure safe conditions for handling, storage and disposal of the product, and to assume liability for loss, injury, damage or expense due to improper use. The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release.
Revision information	This document has undergone significant changes and should be reviewed in its entirety.

# SAFETY DATA SHEET

# 1. Identification

1. Identification			
Product identifier	PLEXUS® MA425 Adhesive	•	
Other means of identification SKU#	0982		
Recommended use	Not available.		
Recommended restrictions	None known.		
Manufacturer/Importer/Supplier	/Distributor information		
Manufacturer			
Company name Address	ITW Performance Polymers 30 Endicott Street Danvers, MA 01923 United States		
Telephone	Customer Service	978-777-1100	
Website	www.itwperformancepolymer	s.com	
E-mail	Not available.		
Contact person	EHS Department Chemtrec	800-424-9300	
Emergency phone number	International	703-527-3887	
2. Hazard(s) identification	1		
Physical hazards	Flammable liquids		Category 2
Health hazards	Acute toxicity, inhalation		Category 4
	Skin corrosion/irritation		Category 2
	Serious eye damage/eye irrit	ation	Category 2A
	Sensitization, skin		Category 1A
	Specific target organ toxicity,	single exposure	Category 3 respiratory tract irritation
Environmental hazards	Not classified.	enigie expected	
OSHA defined hazards	Not classified.		
Label elements			
Signal word	Danger		
Hazard statement			in irritation. May cause an allergic skin reaction. ed. May cause respiratory irritation.
Precautionary statement			
Prevention	Keep away from heat/sparks/open flames/hot surfaces No smoking. Keep container tightly closed. Ground/bond container and receiving equipment. Use explosion-proof electrical/ventilating/lighting equipment. Use only non-sparking tools. Take precautionary measures against static discharge. Avoid breathing mist/vapors. Wash thoroughly after handling. Use only outdoors or in a well-ventilated area. Contaminated work clothing must not be allowed out of the workplace. Wear protective gloves/eye protection/face protection.		
Response	If on skin (or hair): Take off immediately all contaminated clothing. Rinse skin with water/shower. If inhaled: Remove person to fresh air and keep comfortable for breathing. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Call a poison center/doctor if you feel unwell. If skin irritation or rash occurs: Get medical advice/attention. If eye irritation persists: Get medical advice/attention. Take off contaminated clothing and wash it before reuse. In case of fire: Use appropriate media to extinguish.		

Keep cool. Store in a well-ventilated place. Keep container tightly closed. Store locked up.

Storage

extinguish.

Static accumulating flammable liquid can become electrostatically charged even in bonded and grounded equipment. Sparks may ignite liquid and vapor. May cause flash fire or explosion.

None.

# 3. Composition/information on ingredients

#### **Mixtures**

Chemical name	Common name and synonyms	CAS number	%
Methyl Methacrylate		80-62-6	60 - 80
METHACRYLIC ACID		79-41-4	1 - 2.5
Other components below rep	oortable levels		20 - 40

4. First-aid measures	
Inhalation	Remove victim to fresh air and keep at rest in a position comfortable for breathing. Oxygen or artificial respiration if needed. Call a poison center or doctor/physician if you feel unwell.
Skin contact	Remove contaminated clothing immediately and wash skin with soap and water. In case of eczema or other skin disorders: Seek medical attention and take along these instructions. Wash contaminated clothing before reuse.
Eye contact	Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention if irritation develops and persists.
Ingestion	Rinse mouth. Get medical attention if symptoms occur.
Most important symptoms/effects, acute and delayed	Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. May cause respiratory irritation. Skin irritation. May cause redness and pain. May cause an allergic skin reaction. Dermatitis. Rash.
Indication of immediate medical attention and special treatment needed	Provide general supportive measures and treat symptomatically. Thermal burns: Flush with water immediately. While flushing, remove clothes which do not adhere to affected area. Call an ambulance. Continue flushing during transport to hospital. Keep victim warm. Keep victim under observation. Symptoms may be delayed.
General information	Take off all contaminated clothing immediately. If you feel unwell, seek medical advice (show the label where possible). Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves. Wash contaminated clothing before reuse.

# 5. Fire-fighting measures

Suitable extinguishing media	Water fog. Foam. Carbon dioxide (CO2). Dry chemical powder, carbon dioxide, sand or earth may be used for small fires only.
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.
Specific hazards arising from the chemical	Vapors may form explosive mixtures with air. Vapors may travel considerable distance to a source of ignition and flash back. This product is a poor conductor of electricity and can become electrostatically charged. If sufficient charge is accumulated, ignition of flammable mixtures can occur. To reduce potential for static discharge, use proper bonding and grounding procedures. This liquid may accumulate static electricity when filling properly grounded containers. Static electricity accumulation may be significantly increased by the presence of small quantities of water or other contaminants. Material will float and may ignite on surface of water. During fire, gases hazardous to health may be formed.
Special protective equipment and precautions for firefighters	Self-contained breathing apparatus and full protective clothing must be worn in case of fire.
Fire fighting equipment/instructions	In case of fire and/or explosion do not breathe fumes. Move containers from fire area if you can do so without risk.
Specific methods	Use standard firefighting procedures and consider the hazards of other involved materials.
General fire hazards	Highly flammable liquid and vapor.

# 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures	Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Eliminate all ignition sources (no smoking, flares, sparks, or flames in immediate area). Wear appropriate protective equipment and clothing during clean-up. Avoid breathing mist/vapors. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ventilate closed spaces before entering them. Use appropriate containment to avoid environmental contamination. Transfer by mechanical means such as vacuum truck to a salvage tank or other suitable container for recovery or safe disposal. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.

Methods and materials for containment and cleaning up	Eliminate all ignition sources (no smoking, flares, sparks, or flames in immediate area). Keep combustibles (wood, paper, oil, etc.) away from spilled material. Take precautionary measures against static discharge. Use only non-sparking tools.
	Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Use a non-combustible material like vermiculite, sand or earth to soak up the product and place into a container for later disposal. Following product recovery, flush area with water.
	Small Spills: Absorb with earth, sand or other non-combustible material and transfer to containers for later disposal. Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.
	Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS.
Environmental precautions	Avoid discharge into drains, water courses or onto the ground. Use appropriate containment to avoid environmental contamination.
7. Handling and storage	
Precautions for safe handling	Do not handle, store or open near an open flame, sources of heat or sources of ignition. Protect material from direct sunlight. When using do not smoke. Explosion-proof general and local exhaust ventilation. Minimize fire risks from flammable and combustible materials (including combustible dust and static accumulating liquids) or dangerous reactions with incompatible materials. Handling operations that can promote accumulation of static charges include but are not limited to: mixing, filtering, pumping at high flow rates, splash filling, creating mists or sprays, tank and container filling, tank cleaning, sampling, gauging, switch loading, vacuum truck operations. Take precautionary measures against static discharges. All equipment used when handling the product must be grounded. Use non-sparking tools and explosion-proof equipment. Avoid breathing mist/vapors. Avoid contact with eyes, skin, and clothing. Use only outdoors or in a well-ventilated area. Wear appropriate personal protective equipment. Observe good industrial hygiene practices. For additional information on equipment bonding and grounding, refer to the Canadian Electrical Code in Canada, (CSA C22.1), or the American Petroleum Institute (API) Recommended Practice 2003, "Protection Against Ignitions Arising out of Static, Lightning, and Stray Currents" or National Fire Protection Association (NFPA) 77, "Recommended Practice Code".
Conditions for safe storage, including any incompatibilities	Store locked up. Keep away from heat, sparks and open flame. Prevent electrostatic charge build-up by using common bonding and grounding techniques. Eliminate sources of ignition. Avoid spark promoters. Ground/bond container and equipment. These alone may be insufficient to remove static electricity. Store in a cool, dry place out of direct sunlight. Store in tightly closed container. Store in a well-ventilated place. Keep in an area equipped with sprinklers. Store away from incompatible materials (see Section 10 of the SDS).

US NIOSH Pocket Guide to		-	
METHACRYLIC ACID (C	,	Can be absorbed through the skin.	
Appropriate engineering controls	Explosion-proof general and local exhaust ventilation. Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station and safety shower.		
Individual protection measures	, such as personal pro	ective equipment	
Eye/face protection	Chemical respirator v	th organic vapor cartridge and full facepiece.	
Skin protection			
Hand protection	Wear appropriate chemical resistant gloves.		
Other	Wear appropriate ch	nical resistant clothing.	
<b>Respiratory protection</b>	Chemical respirator	th organic vapor cartridge and full facepiece.	
Thermal hazards	Wear appropriate the	mal protective clothing, when necessary.	
General hygiene considerations	after handling the ma	oke. Always observe good personal hygiene measures, such as washing erial and before eating, drinking, and/or smoking. Routinely wash work e equipment to remove contaminants. Contaminated work clothing should not vorkplace.	

# 9. Physical and chemical properties

3. Filysical and chemical properties		
Appearance	Paste.	
Physical state	Liquid.	
Form	Paste.	
Color	Off-white.	
Odor	Fragrant	
Odor threshold	Not available.	
рН	Not available.	
Melting point/freezing point	-54.4 °F (-48 °C) estimated	
Initial boiling point and boiling range	212.9 °F (100.5 °C) estimated	
Flash point	50.0 °F (10.0 °C) estimated	
Evaporation rate	3 (butyl acetate = 1)	
Flammability (solid, gas)	Not applicable.	
Upper/lower flammability or exp	losive limits	
Flammability limit - lower (%)	1.7 %	
Flammability limit - upper (%)	12.5 %	
Explosive limit - lower (%)	Not available.	
Explosive limit - upper (%)	Not available.	
Vapor pressure	28 mm Hg	

Vapor density	> 1
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	789 °F (420.56 °C)
Decomposition temperature	Not available.
Viscosity	Not available.
Other information	
Density	0.98 g/cm3 estimated
Explosive properties	Not explosive.
Flammability class	Flammable IB estimated
Oxidizing properties	Not oxidizing.
Specific gravity	0.98 estimated

# 10. Stability and reactivity

Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
Chemical stability	Material is stable under normal conditions.
Possibility of hazardous reactions	Hazardous polymerization does not occur.
Conditions to avoid	Avoid heat, sparks, open flames and other ignition sources. Avoid temperatures exceeding the decomposition temperature. Avoid temperatures exceeding the flash point. Contact with incompatible materials.
Incompatible materials	Strong oxidizing agents. Nitrates. Peroxides.
Hazardous decomposition products	No hazardous decomposition products are known.

# 11. Toxicological information

Information on likely routes of exposure		
Inhalation	Harmful if inhaled.	
Skin contact	Causes skin irritation. May cause an allergic skin reaction.	
Eye contact	Causes serious eye irritation.	
Ingestion	Expected to be a low ingestion hazard.	
Symptoms related to the physical, chemical and toxicological characteristics	Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. May cause respiratory irritation. Skin irritation. May cause redness and pain. May cause an allergic skin reaction. Dermatitis. Rash.	

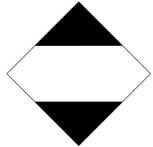

# Information on toxicological effects

Acute toxicity	Harmful if inhaled.	
Components	Species	Test Results
METHACRYLIC ACID (CA	AS 79-41-4)	
Acute		
Dermal		
LD50	Rabbit	500 mg/kg
Inhalation		
LC50	Rat	7.1 mg/l, 4 Hours
Oral		
LD50	Rat	1060 mg/kg
Methyl Methacrylate (CAS	\$ 80-62-6)	
Acute		
Inhalation		
LC50	Mouse	18.5 mg/l, 2 Hours

Components	Species	Test Results
Oral		
LD50	Rat	7800 mg/kg
Skin corrosion/irritation	Causes skin irritation.	
Serious eye damage/eye rritation	Causes serious eye irritation.	
Respiratory or skin sensitization	n	
ACGIH sensitization		
METHYL METHACRYLA	TE (CAS 80-62-6)	Dermal sensitization
<b>Respiratory sensitization</b>	Not a respiratory sensitizer.	
Skin sensitization	May cause an allergic skin reaction.	
Germ cell mutagenicity	No data available to indicate product or any components present at greater than 0.1% are mutagenic or genotoxic.	
Carcinogenicity	Not classifiable as to carcinogenicity to humans.	
IARC Monographs. Overall	Evaluation of Carcinogenicity	
Not listed.	ed Substances (29 CFR 1910.1	
Not listed.	ogram (NTP) Report on Carcin	oyena
Reproductive toxicity	This product is not expected t	o cause reproductive or developmental effects.
Specific target organ toxicity - single exposure	May cause respiratory irritatio	
Specific target organ toxicity - repeated exposure	Not classified.	
Aspiration hazard	Not an aspiration hazard.	
12. Ecological informatio	n	
Ecotoxicity	possibility that large or freque	as environmentally hazardous. However, this does not exclude the nt spills can have a harmful or damaging effect on the environment
Persistence and degradability Bioaccumulative potential	No data is available on the de	gradability of any ingredients in the mixture.
Partition coefficient n-octar	nol / water (log Kow)	
METHACRYLIC ACID Methyl Methacrylate		0.93 1.38
Mobility in soil	No data available.	1.56
Other adverse effects		organic compounds which have a photochemical ozone creation
13. Disposal consideration	•	
Disposal instructions	Collect and reclaim or dispose material under controlled con	e in sealed containers at licensed waste disposal site. Incinerate the ditions in an approved incinerator. Do not incinerate sealed
	contents/container in accorda	product is considered a RCRA ignitable waste, D001. Dispose of nce with local/regional/national/international regulations.
Local disposal regulations	Dispose in accordance with a	II applicable regulations.
Hazardous waste code	D001: Waste Flammable material with a flash point <140 F The waste code should be assigned in discussion between the user, the producer and the waste disposal company.	
Waste from residues / unused products	Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).	
Contaminated packaging		y retain product residue, follow label warnings even after container i ould be taken to an approved waste handling site for recycling or
